

PravRaha

Privacy Policy

How PravRaha collects, uses, and protects personal data.

Effective Date: December 1, 2025

Issued by: Pravraha Software Technology Private Limited, Ranchi, Jharkhand, India 834004

Contact: support@pravraha.com • <https://pravraha.com>

This Privacy Policy explains how Pravraha Software Technology Private Limited (“PravRaha,” “we,” “us,” “our”) collects, uses, shares, and protects personal data in connection with our website at <https://pravraha.com> (the “Site”) and our cloud-hosted sales intelligence and outbound infrastructure platform (the “Platform”), together with associated APIs, integrations, and services (collectively, the “Services”).

We have written this Policy to be readable. Where legal terms are necessary, we explain them. Where we make commitments, we mean them.

1. Who We Are

PravRaha is a private company incorporated in India. Our registered office is at Ranchi, Jharkhand, India 834004. For any privacy-related question, complaint, or rights request, contact our Grievance Officer at support@pravraha.com with the subject line "Grievance Officer."

PravRaha's authorised representative for European Union matters and any UK-specific contact details, where applicable, are published at <https://pravraha.com/legal>.

2. The Two-Track Data Architecture You Should Know About

PravRaha is unusual among privacy notices in being explicit about this: we process two materially different categories of personal data, and they carry different rights and obligations.

Track A - Customer Data. Personal data of our paying customers, their employees, and authorised users (account information, billing details, usage telemetry, communications with our team, and any data our customers upload, integrate, or generate while using the Platform). For Track A, our customer is the controller and PravRaha is the processor, acting on the customer's documented instructions.

Track B - Prospect Data. Business contact and professional information about individuals that customers wish to engage in B2B sales outreach (typically: name, business email, business phone, job title, employer, professional history, publicly observable signals of buying intent). For Track B, PravRaha acts as an independent controller, or, where the customer co-determines the purposes, as a joint controller.

The rights you have, and the obligations we carry, depend on which track applies. Section 10 sets this out by individual.

3. Personal Data We Collect

3.1 Customer and Authorised User Data

- Identity and contact: name, business email, business phone, job title, employer.
- Authentication: hashed passwords, SSO identifiers, MFA factors.
- Billing: company name, billing contact, GSTIN and other tax identifiers, billing address. We do not store full payment card numbers; payment processors handle that.
- Usage telemetry: features used, queries run, exports, login timestamps, IP addresses, device and browser metadata.
- Support and communications: tickets, emails, recordings of voluntarily joined demo or training calls, chat transcripts.

3.2 Customer-Uploaded Data

Any data the customer chooses to upload, integrate, or generate through the Platform - including CRM records, target account lists, sequence content, and outreach activity logs. PravRaha processes this as a processor under the customer's written agreement and our Data Processing Agreement ("DPA").

3.3 Prospect Data

- Identity and professional: name, business email, business phone, current and prior job titles, employer, location at country, region, and city level, professional profile URLs.
- Business signals: company size, funding events, technology stack, hiring activity, publicly observable role changes, buying-intent signals derived from third-party data partners.
- Derived and inferred: scoring, fit indicators, recommended sequencing.

We do not knowingly collect, infer, or maintain special categories of personal data (including data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, trade union membership, genetic data, biometric data, health data, or data concerning sexual orientation) about prospects. Customers shall not upload such data to the Platform.

3.4 Technical Data

IP address, browser type, device identifiers, referring URL, pages viewed, time on page, cookie identifiers, and similar telemetry from visitors to our Site and users of the Platform.

4. Sources of Personal Data

We collect personal data from four sources:

- **Directly from you**, when you sign up, communicate with us, or use the Platform.
- **From our customers**, when they upload, integrate, or otherwise transmit data to the Platform.
- **From licensed third-party data providers** under written contracts that include representations as to lawful sourcing. Our current data-provider categories are summarised in our Sub-processor List (Section 7); specific provider identities are made available to enterprise customers under non-disclosure agreement.
- **From publicly available sources**, including corporate websites, regulatory filings, public business directories, and professional networking platforms (only to the extent the relevant platform's terms permit, and only for business contact information used in a B2B sales context).

We do not purchase consumer data, scrape platforms in violation of their terms of service, or accept data of unverifiable origin.

5. How and Why We Use Personal Data

The following table sets out our processing purposes, the track they relate to, and the lawful basis (under the EU General Data Protection Regulation) or the ground of processing (under India's Digital Personal Data Protection Act, 2023) on which we rely.

Purpose	Track	Lawful Basis / Ground
Provide the Services to you or your employer	A	Contract performance
Authenticate users, prevent fraud, secure the Platform	A	Legitimate interests; legal obligation
Bill customers and collect payment	A	Contract; legal obligation
Provide product support and respond to inquiries	A	Contract; legitimate interests
Improve the Platform (aggregate analytics, debugging)	A, B	Legitimate interests
Compile and maintain the Prospect Database for B2B sales intelligence	B	Legitimate interests (B2B sales context) / certain legitimate uses under the DPDP Act
Communicate marketing about PravRaha (existing customers or with separate consent)	A	Consent; legitimate interests
Comply with law and lawful requests	A, B	Legal obligation

Commitment on AI model training. PravRaha does not use Customer Data or Prospect Data to train third-party (foundation) AI models. We may use customer-aggregated, de-identified, or PravRaha-controlled data to improve our own internal ranking, scoring, and recommendation models. Customers may opt their account out of contributing to model improvement at any time via their account settings or by emailing support@pravraha.com. This commitment is contractual, not merely policy-stated, and is restated in our Terms and DPA.

6. AI and Automated Processing

The Platform uses machine learning and large language models - both PravRaha-developed and third-party (which currently include Anthropic) - to generate recommendations, scoring, draft outreach content, and other outputs. You should understand:

- AI outputs are probabilistic. They can be wrong, out of date, biased, or unsuitable for a given purpose. Human review by a competent operator is required before any AI-generated content is sent, published, or relied upon.
- We do not make solely automated decisions that produce legal or similarly significant effects on individuals, within the meaning of Article 22 of the GDPR or comparable provisions.

- We log AI inputs and outputs for security, abuse detection, and model improvement, subject to the retention periods in Section 9 and the customer opt-out described in Section 5.
- Where the EU AI Act or comparable regulations require disclosure that content has been generated or materially modified by AI, customers are responsible for making that disclosure in their own outreach.

7. Sharing of Personal Data

We share personal data with the following recipients:

- **Sub-processors** who provide infrastructure and services strictly to deliver the Platform (cloud hosting, data enrichment partners, email infrastructure providers, customer support, analytics). Our current Sub-processor List, including each sub-processor's name, function, and jurisdiction of processing, is maintained at <https://pravraha.com/subprocessors> and is updated with at least 14 days' advance notice for enterprise customers, who may reasonably object as set out in our Terms.
- **Service providers** under written confidentiality and data protection terms.
- **Authorities** when required by law, court order, or to protect rights, safety, and property.
- **Successors** in the event of merger, acquisition, financing, or sale of assets, subject to equivalent privacy commitments.

We do not sell personal data, as that term is defined under the California Consumer Privacy Act or comparable laws. We do not share Customer Data with other customers. We do not share Prospect Data with any party except as strictly necessary to deliver the Services to the customer that retrieved or licensed it.

8. International Data Transfers

We are headquartered in India and our primary data hosting is in AWS Asia Pacific (Mumbai). Sub-processors operate from multiple jurisdictions including the United States and the European Economic Area.

Where personal data of EU, EEA, or UK data subjects is transferred outside those regions, we rely on the Standard Contractual Clauses adopted by the European Commission, the UK International Data Transfer Agreement or Addendum, and supplementary technical and organisational measures as appropriate. Where personal data of Indian data subjects is transferred outside India, we comply with the cross-border transfer requirements of the DPDP Act, 2023 and the rules issued thereunder.

A copy of our standard transfer instruments is available to enterprise customers on written request.

9. Data Retention

We retain personal data only as long as needed for the purposes described in this Policy, or as required by law. Indicative retention periods are set out below; specific contracts may vary these for enterprise customers.

Data Category	Retention Period
Active customer account data	Duration of the customer agreement plus 12 months
Billing and financial records	8 years (Indian Companies Act and GST requirements)
Customer-uploaded data after termination	Returned or deleted within 30 days of written request, then purged from backups within 90 days
Prospect Database records	Refreshed continuously; opt-out requests result in suppression within 30 days, and durable suppression-list retention thereafter
Support communications	3 years
Site and product analytics	26 months
Security logs	12 months

10. Your Rights

Subject to applicable law, you have rights including: access, rectification, erasure, restriction of processing, objection to processing, portability, withdrawal of consent, and the right to lodge a complaint with a supervisory authority.

10.1 If You Are a Customer or Authorised User

Most of your rights are exercised through your account settings or by contacting your account administrator. For requests we must action directly, write to support@pravraha.com. We will respond to verifiable requests within 30 days, extendable to 60 days for complex requests, and we will not charge you for reasonable requests.

10.2 If You Are a Prospect

If your information appears in the PravRaha Prospect Database without you being our customer, the following apply:

- You may opt out of being included in the Database and request suppression at <https://pravraha.com/opt-out> or by emailing support@pravraha.com.
- You may request a copy of the personal data we hold about you, including its source category.

- We will action verifiable requests within 30 days (extendable to 60 days where complex), and we will not charge you for reasonable requests.

Where we have not collected your data directly from you, we rely on the disproportionate-effort exception in Article 14(5)(b) of the GDPR (and comparable provisions in other regimes) for individual notice. We discharge the residual obligation through public availability of this Policy and the opt-out and access mechanisms above.

10.3 Jurisdictional Add-ons

India (DPDP Act, 2023): You may exercise the rights of a Data Principal, including correction, erasure, nomination, and grievance redressal. Our Grievance Officer is reachable at support@pravraha.com (subject: Grievance Officer). Unresolved grievances may be referred to the Data Protection Board of India.

EU, EEA, and UK (GDPR and UK GDPR): All rights under Articles 15 to 22 apply where we are the controller. You may complain to your local supervisory authority.

California (CCPA and CPRA): Right to know, delete, correct, opt out of sale or sharing, and non-discrimination. We do not sell personal information.

Brazil (LGPD), Canada (PIPEDA), Australia (Privacy Act): Equivalent rights apply where the underlying law applies to processing.

11. Security

We maintain administrative, technical, and physical safeguards designed to protect personal data, including: encryption in transit (TLS 1.2 or higher) and at rest (AES-256), role-based access control, multi-factor authentication enforced on production systems, principle-of-least-privilege access, vulnerability management, logging and monitoring, an incident-response procedure, and vendor security reviews. We are progressing toward SOC 2 Type II and ISO/IEC 27001 certifications and will publish updated assurance documentation when available.

No system is perfectly secure. If you believe your account has been compromised, contact us immediately at support@pravraha.com.

12. Cookies and Tracking

The Site uses cookies and similar technologies for authentication, preference storage, analytics, and (where you consent) marketing measurement. You can manage your preferences via the cookie banner on first visit or your browser settings at any time. A detailed list of cookies, their purposes, and durations is available at <https://pravraha.com/cookies>.

13. Children

The Services are intended for business users 18 years of age or older. We do not knowingly collect personal data from anyone known or reasonably believed to be under 18, and our customers undertake not to upload such data to the Platform. If you believe we have collected such data, contact us and we will delete it. Where India's DPDP Act or other applicable laws impose stricter rules for children's data, those apply.

14. Grievance Officer and Regulatory Contacts

India (DPDP Act, 2023) Grievance Officer. A designated officer is responsible for redressal of grievances raised by Data Principals. Contact: support@pravraha.com, subject line "Grievance Officer."

Acknowledgement within 7 business days; resolution within 30 days of acknowledgement, save for matters requiring extended review.

EU and UK queries. support@pravraha.com, subject line "EU Data Protection."

All other jurisdictions. support@pravraha.com.

15. Changes to this Policy

We may update this Policy. Material changes will be notified to active customers by email at least 14 days before they take effect, and posted on the Site with a revised Effective Date. Continued use of the Services after the Effective Date constitutes acceptance. Where required by law, we will obtain consent before applying material changes.

© Pravraha Software Technology Private Limited. All rights reserved. This Policy was last updated on the Effective Date stated on the cover page.
